CLEAN & GREEN CAMPUS

A. In the College Campus

- 1. College Cleaning dated 13 to 17th August 2018**
Participation Total = 42 Girls = 17 Boys = 25

Under the Swach Bharath Pakhawada our college students started the college campus cleaning Champaign focusing on cleaning the common area, classrooms, laboratory, Library and even college toilets. Student-led initiatives for college cleaning in Champaign empower the campus community to take ownership of their environment. Engaging students in cleaning activities fosters a sense of responsibility and pride in maintaining a clean campus. Collaborative cleaning efforts between students and custodial staff promote a culture of cooperation and mutual respect. Incorporating cleaning tasks into student organizations' activities encourages participation and fosters a sense of community. Student-led cleaning projects can focus on specific areas of concern, addressing cleanliness issues effectively and efficiently. By involving students in cleaning activities, colleges in Champaign can promote environmental awareness and sustainable practices. Offering incentives or recognition for student-led cleaning initiatives incentivizes participation and reinforces positive behavior.

3. Plastic Collection at College Campus

Plastic Collection from college campus and Recycling: A Green Initiative

Our college students group had collected 7 kg of plastic on 04/12/2021 and on dated 21/12/2021 about 21 kg of plastic and sent it to recycle process by truck-tempo. The College campuses are embracing plastic collection and recycling as a prominent green initiative to fight environmental degradation. These initiatives underscore the commitment of academic institutions to sustainability and environmental management. By implementing comprehensive plastic collection programs, campuses are actively addressing the pressing issue of plastic pollution. Through strategic placement of recycling bins and educational campaigns, students, faculty, and staff are encouraged to participate in the initiative. The collected plastic materials undergo

sorting and processing, with a focus on recycling and minimum use of plastic. Beyond waste management, these initiatives foster a culture of environmental responsibility and conscientious consumption among the campus community. Students often take leadership roles in organizing and promoting plastic collection drives, further amplifying the impact of these green initiatives. Collaborations with industry stakeholders and government agencies extend the reach of campus recycling efforts and contribute to larger-scale systemic change. Ultimately, plastic collection on college campuses serve as a beacon of sustainability, inspiring individuals and institutions alike to embrace eco-friendly practices for a greener future.

B. ENVIRONMENTAL PROMOTIONAL ACTIVITIES

Beyond The College Campus

1. TREE PLANTATION :

Pit Digging and Tree Plantation : Dated 2nd August 2019

Place : A.P.J. Abdul Kalam Azad Entertainment Park, Hari Om Nagar, Mulund (E)

Participation : Girls = 41 and Boys = 53 Total = 94

Total Saplings = 273

Our college every year in the rainy season does the tree plantation as part of social responsibility and to care about mother environment. The tree plantation is vital for combating climate change and preserving biodiversity. It helps to mitigate air pollution by absorbing carbon dioxide and releasing oxygen. Trees provide habitat for wildlife and contribute to

ecosystem stability. Planting trees helps to prevent soil erosion and improve water quality. It enhances the beauty of landscapes and creates green spaces for recreation. Tree plantation projects offer opportunities for community engagement and empowerment. Sustainable forestry practices ensure the long-term health and productivity of forests. Urban tree planting initiatives can reduce the heat island effect in cities. Agroforestry systems integrate trees into agricultural landscapes, promoting sustainability.

Collaborative efforts are essential for scaling up tree plantation efforts and we are trying from a larger perspective.

2. Ban on Plastic : Cloth and Paper Bag Distribution dated 8-10th September 2018

Place : College Area and Crawford Market

Participation Total = 71 Girls = 28 Boys = 43

Our college students started the green initiative promoting the ban on plastic made bags and distributing the cloth and paper made bags free of charge in the market area and college area and making people aware. Implementing a ban on plastic bags reduces environmental pollution and plastic waste. The paper bags offer a biodegradable alternative, minimizing ecological harm. Paper bags are recyclable and can be made from renewable resources like trees. The switch to paper bags promotes sustainable consumption and production practices. It encourages businesses and consumers to adopt eco-friendly alternatives. Paper bags are durable and can be reused multiple times before recycling. The

ban on plastic bags and adoption of paper bags support circular economy principles. Governments and businesses can collaborate to ensure the availability and affordability of paper bags. Public awareness campaigns can educate communities about the benefits of switching from plastic to paper. Overall, the transition from plastic to paper bags contributes to a cleaner and healthier environment.

3. Beach Cleanliness Drive at Dadar

Normally the visitors at beaches and after the Ganapati Idols immersion Mumbai beaches particularly at Dadar/Chowpatty accumulate lots of plastic and non-degradable material. Our college student's voluntarily involved in these activities for the beach cleaning. Beach cleaning drives in Mumbai aim to preserve the coastal ecosystem and marine life. Volunteers gather to remove plastic debris, litter, and other pollutants from the shoreline. These drives promote environmental awareness and civic responsibility among residents. Collaboration between local authorities, NGOs, and community groups ensures the success of the initiative. Cleaning drives help maintain the aesthetic appeal of Mumbai's beaches, enhancing tourism. Regular clean-ups mitigate the impact of pollution on marine habitats and coastal biodiversity. Education programs accompany these drives, informing the public about the importance of waste management. Innovative techniques such as sorting and recycling are employed to minimize waste sent to landfills. Public participation is encouraged through social media campaigns, reaching a wider audience. The collective effort towards beach cleaning fosters a sense of pride and ownership in preserving Mumbai's coastline.
